

Joint statement of RPF and ULFA (I)

Indian Army attacked PLA and ULFA (I) camps using WARMATE (CUAV) laden with controversial Thermobaric weapons on July 13, 2025

Camps of PLA and ULFA (I) were attacked on July 13, 2025 using High-end drones. From the debris of the drones, one particular drone is identified that the attacker used Poland made WARMATE loitering munition laden with controversial "Thermobaric Bomb (Vacuum Bomb)". The WARMATE combat unmanned aerial vehicle (CUAV), is manufactured by WB Electronics SA (WB Group) Poland, a private defence company and operational range of WARMATE is 30 km. The price for a single WARMATE unit is estimated at around thirty-thousand US Dollar. Moreover, Thermobaric bombs, detonating the air, caused the blazing of the camps.

Up till now, the WARMATE operators are Georgia, India, Libya, Poland, Ukraine and United Arab Emirates and, Japan and South Korea are testing and ordering WARMATE. According to the Vayu Aerospace Review (June 19, 2022), India received WARMATEs in 2022. Indian Army even had tested WARMATE in Kashmir, in the Ladakh region, in high mountain areas near the border with People's Republic of China.

There is no reason to think that WARMATE operators like Georgia, Libya, Poland, Ukraine or UEA would attack PLA and ULFA (I). Among the WARMATE operator countries, only India, since PLA and ULFA (I) are the archenemy of India, is the warranted candidate to attack PLA and ULFA (I) using WARMATE and suspected other UAV like SkyStiker, suicide drone of Alpha Design, a joint venture company with Elbit Systems of Israel and other models were used. According to the local public, it was reported that UAVs were launched from Wangti and a place in between Nampong and Joyrampur.

From our camps, so far, we have recovered five Type 3 WARMATE wreckages of Year 2022, the same year India received from WB Electronics SA, Poland and serial numbers are 22001930, 22002508, 22002549, 22007040 and 22007293. Interestingly India used WARMATE from the same batch against Pakistan during Operation Sindoor.

Even if India knew that the wreckages from drones will identified the made of drones and their operators, Indian Army and Chief Ministers denied their involvement in the July 13, 2025 attack against PLA and ULFA (I). CM of Arunachal Pradesh, Assam, Manipur and Nagaland being a puppet of India, will "sing and dance" according to his puppet master India but question is "Why Indian Army denied the operation".

Wise people of WESEA Region already knew that India does not want the people of WESEA united. To make sure WESEA people never unite, India is keeping the people of WESEA divided along the ethnic and religious lines, salting the old wounds, creating and funding the pseudo revolutionaries, hiring foreign mercenaries, stalling leaders who want wealth and status offering them power in exchange for loyalty to India. Find most corrupt people and manipulate them to be a puppet or henchman to serve India's interest not their people. If a leader who actually cares about their people rises, get rid of him or destabilise their government to control by the Centre. Being cunning had become as second nature of Indian politicians and bureaucrats, deceiving and dividing the people of the WESEA is in fact a good policy for India because India does not care the people, India only care about the resourceful land of ours. That is why India denied the drone attack against PLA and ULFA (I) on July 13, 2025.

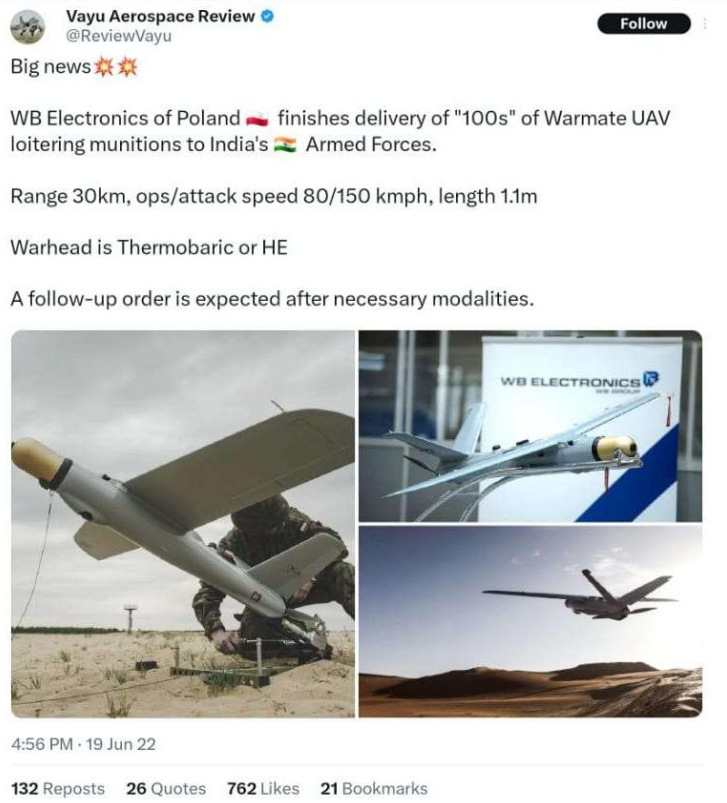

Victory to PLA and ULFA (I)

Long Live People's Revolution of WESEA

Camps Burned Down By the Thermobaric (Vacuum) Booms
